PERSONAL PROFILE

I'm eagerly to do new things with less coding and implement existing technologies with future aspects. My expertise is in Django(Python) and i willing to accept new challenges. A hard-working, self-motivated and undergraduate student.

PROJECTS

E-Farming (4th SEM | May 2019)
PHP and MYSQL

- It is a website for online buying an agriculture products, Customer can buy products and admin can manage all the products and also maintain stock.The website also guide the farmers to access new farming techniques.

T-Shirt store (July 2020)
Django REST Framework and React JS(Hooks)

- It is basically ecommerce website with payment gateway (braintree) and it consist of user and admin module. In which user will purchase a t-shirt and will see all their previous order. On the other side admin keep track of all transaction and maintain t-shirt in his stock.

Academy (August 2020)
Django REST Framework, React JS(Hooks) & PostgreSQL

- In the academy, many courses are there and interested students will purchase that course and will see video lectures and also download it. On the other side, teacher will see enrolled student and upload lecture to courses which is assigned by admin to him/her. Admin will manage everything.

ACADEMIC SEMINARS

Advance Technology and Automation in Agriculture (3rd sem)
SMS (Soil Moisture Sensor) (5th sem)
